OUR COMPANY'S QUANTITATIVE GHG REDUCTION TARGETS ARE (OPTIONAL):

In 2021 we set ambitious carbon reduction targets that follow the direction of the scientific community for what is needed to prevent the worst effects of climate change, limiting global temperature rise to 1.5 degrees Celsius. By 2030, we committed to reducing our absolute emissions from Burton facilities and operations by 42% (Scope 1) AND a 55% reduction in supply chain emissions per \$ of profit (Scope 3 purchased goods and services & transportation and distribution), from a 2020 baseline.

OUR COMPANY CAN DEMONSTRATE MEASURABLE REDUCTIONS IN EMISSIONS OVER A SPECIFIED TIME PERIOD:

☒ Yes If yes, please describe the amount reduced and time period.

☐ Not yet

12% reduction in absolute Scope 1 & 2 emissions collectively for our three largest offices in 2020 compared with a 2012 baseline. 21% average emissions reduction per unit for snowboards in W22 season compared with a W17 baseline.

OUR COMPANY'S DESCRIPTION OF ADDITIONAL QUANTIFIED GHG REDUCTION ACHIEVEMENTS (OPTIONAL):

Scope 1 & 2: 12% carbon reduction in 2020 compared with a 2012 baseline for the collective footprint of Burton's three largest office facilities globally.

Scope 3 progress varied by hardgood product category, measured as the average carbon emissions per unit in the Winter 2022 product season compared with a Winter 2017 baseline. Snowboards: 21% reduction; Bindings: 6% reduction; Boots: 5% increase; Helmets: 10% increase; Goggles: 20% increase. Carbon emissions increases are primarily attributed to product design changes for innovative functionality.

ADDITIONAL DETAILS ABOUT OUR COMPANY'S EFFORTS TO ADDRESS CLIMATE CHANGE (OPTIONAL):

Climate is our collective legacy. Burton has been working hard to reduce our own footprint over the past decade but our journey is far from over. To fight for the future of our planet, we started by listening to the latest science and doubled down on our climate commitments. We set even more ambitious carbon reduction targets and pledged to take responsibility for our residual emissions by going climate positive in 2025. But doing our part isn't enough to combat the climate crisis. Burton is proud to work with organizations like the OIA Climate Action Corp that advocate for system level change and combine our individual forces into collective action building a better future for our industry and our planet.
