### ADDITIONAL DETAILS ABOUT OUR COMPANY'S EFFORTS TO ADDRESS CLIMATE CHANGE (OPTIONAL):

Ensuring a sustainable natural world, where fly fishing, wingshooting, and outdoor passions can be passed from generation to generation is at the core of our business. For nearly 60 years we've focused our efforts on habitat and ecosystem conservation and restoration, supported by our 5% for Nature program. In 2021, we supported 115 non-profit organizations with over \$1.5 million, many of which were ecosystem restoration projects to help mitigate the impacts of a warming climate. While many of these efforts are natural climate mitigations or solutions, we recognize we have a responsibility to be a more sustainable company with a plan that lines up with our deep history in conservation.

We've hired Orvis's first Vice President of Conservation & Sustainability to lead the company's long-term vision and strategy. This role will work with cross-functional teams to identify corporate and product sustainability goals and develop the strategies to meet them – from carbon emissions to supply chain processes to accessibility of adventure. As a founding member of the OIA Climate Action Corps, we have been vocal advocates for federal climate policies through sign-on letters and meetings with policymakers, and we are committed to continuing to measure our GHG footprint, setting targets and reducing emissions in the coming year.
