

# A Targeted Look At Participants With Potential

July 2004

Outdoor Industry Foundation (OIF) is the non-profit foundation established by Outdoor Industry Association (OIA) to support programs that increase participation in outdoor recreation and to educate the public about the economic and recreational benefits of the conservation of wild lands. OIA was founded in 1989 and provides trade services for manufacturers, distributors, suppliers, sales representatives and retailers in the outdoor industry. In its efforts to grow participation and the success of the outdoor industry, OIF commissioned Harris Interactive to conduct a consumer research study that will provide OIF with the information to develop an action plan to increase participation in human powered outdoor activities.

OIA would like to thank it's members for contributing to OIF's outreach initiatives with special thanks to Outdoor Retailer and REI for their extremely generous contributions of time and money.

A Note About Copyright: If data from this report is reproduced, Outdoor Industry Foundation's A Targeted Look At Participants with Potential must be referenced as the source. Outdoor Industry Association must review and approve all press releases and other documents prepared to assist in the public dissemination of all survey and research data. Outdoor Industry Association will complete its review within 48 hours of receipt, and usually within less than 24 hours. Thank you.

**For more information** and other research produced by OIA please vist, <u>www.outdoorindustry.org</u>. For media relations or questions regarding research please contact:

## **Table of Contents**

Background & Objectives	3
Opportunities for Growth	4
Interest & Potential	5
Lifetime Spending	9
Youth: 16-24 Year Olds	14
Hispanic	20
45+ Singles	29
Females	35
Lifetime Spending Per Activity on Apparel/Footwear & Equipment	36
Specific Activity Profiles	47

# **Background and Objectives**

This report provides a more detailed look at the target markets identified by the key findings in OIF's *Exploring the Active Lifestyle* report.

#### **Key Findings**

- Well over half of the US population participates in at least one outdoor activity
- ₭ 8 out of 10 current participants are interested in new activities
- A quarter of those who are currently NOT participating in human powered activities show an interest in participating in the next 2 years
- 🛣 The youngest age group is key to building participation in the future
- 🔀 Other potential targets mentioned in the report were Hispanics, Females and 45+ Singles

The populations described in this report have been segmented to reflect these key findings – Strivers, Achievers, and Experienced.

Also included is a profile of each activity's demographic profile, projected lifetime spending summaries for each activity and top five target activities for growing your business.

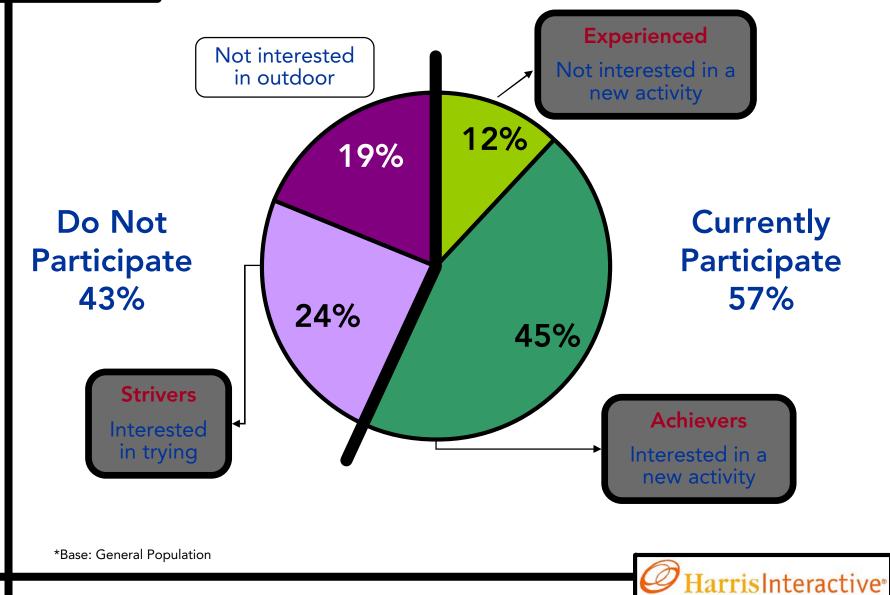

# **Opportunities For Growth**

- Achievers Current Participants who are interested in starting a new activity.
- **Strivers** Non Participants who are interested in starting an outdoor activity.
- **Experienced** Participants who don't plan to start something new.
  - Not surprisingly, the Achiever group reflects the profile of the Experienced (current participants) in general.
  - By contrast, Strivers, skew:
  - Somewhat older particularly in the 45+ set
  - 🔀 Female, less likely to have children, but just as likely to be married
  - 🔀 Less educated, with lower median income

# **Potential Interest In New Activities: 81%**

### Which Activities Are Achievers and Strivers Interested In Trying?

Strivers are most likely to be interested in the "gateway activities" that got the Experienced their start:

- ℞ Paved road cycling (43%)
- 🛣 Camping (tent) (41%)
- \star Hiking (31%)
- ✤ Paddlesports (25%)

By contrast, the Achievers are more likely to be adding to their current activities, creating cross-selling opportunities against the activities they participate in most which are bicycling (paved) – 50%; hiking – 47%; and camping – 47%:

- ✤ Paddlesports (50%)
- Hiking or backpacking (40%)
- Bicycling either paved (21%) or mountain (18%)
- Downhill skiing (16%) or snowboarding (14%)

# Lifetime Spending by Activity

Just as some activities possess more potential from the standpoint of VOLUME of participants, others are more lucrative when it comes to PER PARTICIPANT expenditures for apparel and equipment.

When you combine the volume and per participant expenditure, the top 5 target activities (based on highest lifetime expenditures per participant coupled with the highest expected level of participation) are notably the same for both equipment and apparel. These 5 activities show the most potential for increased spending in the next 2 years.

- 🖈 Road cycling
- 🛧 Camping
- 🖈 Hiking
- 🖈 Rafting
- 😾 Backpacking

### Breakdown of Lifetime Equipment Spending Per Activity

Equipment *	% Participation	Rank as Target
Fly fishing (\$10,518)	12%	
Rafting (\$9,200)	20%	4
CC/Nordic (\$7,603)	7%

Canoeing (\$5,871)	15%	
Hiking (\$5,574)	43%	3
Road Biking (\$5,485)	48%	1
Camping (\$5,417)	47%	2
Climbing (\$5,377)	13%	
Snowboarding (\$4,776)	10%	
Snowshoeing (\$4,276)	5%	
Backpacking (\$4,276)	22%	5
Bird Watching (\$4,026)	13%	* Projected lifetime spending on equipment from age 16-
Mountain Biking (\$3,987)	20%	24, not adjusted for multiple activities.
Trail Running (\$3,191)	10%	

### Breakdown of Lifetime Apparel Spending Per Activity

Apparel	% Participation	Rank as Target
Fly Fishing (\$5,258)	12%	
Downhill skiing (\$5,118)	15%	
Rafting (\$3,997)	20%	4
Road Biking (\$3,647)	48%	1
Trail Running (\$3,234)	10%	
Snowshoeing (\$3,120)	5%	
Backpacking (\$3,120)	22%	5
CC/Nordic Skiing (\$3,053)	7%	
Camping (\$3,001)	47%	2
Snowboarding (\$2,770)	5%	
Kayaking (\$2,756)	16%	
Hiking (\$2,729)	43%	3
Climbing (\$2,582)	13%	* Due is stard life time an analine an annual for some 44
Canoeing (\$2,527)	15%	* Projected lifetime spending on apparel from age 16 24, not adjusted for multiple activities.
Bird Watching (\$2,415)	13%	

# **More Potential When Starting Young**

For the activities that generate the most current and expected participation, the **projected lifetime expenditures**\*\* for apparel and equipment among those who started participating at the 16-24 age range versus those starting at later ages can be projected as follows:

	16-24	25-34	35-44	45+
Camping (tent)	\$8,419	\$7,664	\$6,854	\$3,970
% participate*	62%	61%	57%	32%
Bicycling (paved road)	\$9,133	\$8,342	\$5,664	\$5,359
% participate	59%	58%	52%	40%
Hiking	\$8,304	\$7,620	\$6,410	\$4,685
% participate	49%	51%	48%	36%

\*Past 2 year and next 2 year participation

\*\*Based on average expenditures for all activities – not adjusted for multiple activities

# Youth, Hispanics, 45+ Singles, Females

# Youth – Age 16- 24

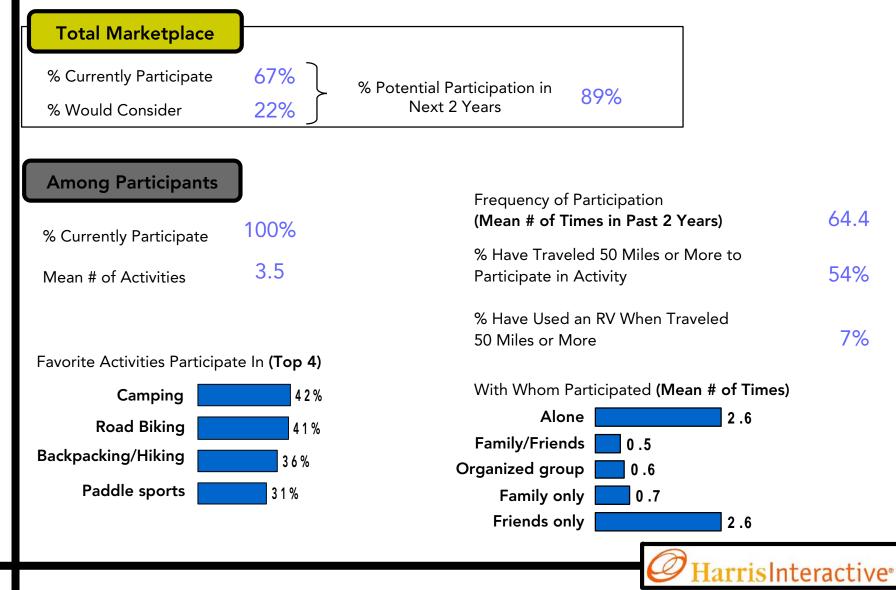

- Among the youth (16-24 year olds) population in the US, two-thirds currently have participated in a human-powered activity in the past 2 years and they account for 1 in 5 of those interested in trying a new activity in the next 2 years.
- ☆ This group tends to participate more often in the more challenging activities (climbing, trail running, downhill skiing and snowboarding), with 3.5 being the average number of activities, and 2.7 times per month participation level per activity.
- ★ Keeping the 16-24 year old engaged and expanding their base of activities is key to a lifetime of continued expenditures.

### **Hispanics**

While current participation is lower among non-Caucasians, there is growing interest in human powered activities among ethnic groups – particularly *Hispanics*. With unprecedented levels of growth in this population in the US, this group will make up a larger proportion of participants in human powered activities as they become more acculturated. The potential for this group participating in human powered activities in the next 2 years stands at 85%.

- The profile of Hispanic participants suggests that they skew younger, have a lower level of education, and have lower income and urban.
- Among younger Hispanic participants, there is above average interest in trying tent camping, paddle sports, cycling, climbing and snowboarding.

# 45+ Singles

While the 45+ group is smaller\_than the lucrative youth market, they are active and interested. Moreover, as the baby boomers age, they are staying active longer. Among the 45+ single group in particular:

- ★ 44% currently participate and 28% would consider trying something new.
- Levels of participation are higher than average (average 3 times per month per activity) and among participants, 2.3 activities is the average.
- Almost a quarter consider themselves to be experts in their activities and a third have introduced others to their sport.

While participation in some of the more physically demanding activities drops off somewhat after the age of 45+, they continue to purchase equipment and apparel for the activities they enjoy. If they have children (28%), they are also spending for them.

### **Females**

Females are more dominant among Strivers than Achievers. This is good news since they have a strong influence in determining the direction of "family" activities as well as household spending.

Strivers in particular skew female urban women – often mothers – in bird watching, camping, climbing and snowshoeing.
