# **ADDITIONAL DETAILS ABOUT OUR COMPANY'S EFFORTS TO ADDRESS CLIMATE CHANGE** (OPTIONAL):

PrimaLoft is combatting climate change through an aggressive approach to reducing our carbon emissions in our manufacturing processes and our supply chain. PrimaLoft completed a comprehensive environmental assessment of the insulation manufacturing processes and identified the most impactful opportunities to reduce carbon emissions. From there, PrimaLoft engineers focused on increasing energy efficiency by making changes around the fiber recipe, introducing new thermal equipment, and optimizing the source of energy to drastically reduce carbon emissions. This proprietary process reduces emissions by up to 70%. In addition to innovations at the manufacturing level, PrimaLoft's longstanding use of recycled material also represents a drastic reduction in emissions. In 2022, we saved more than 8.1 million kgs of CO2, compared to using virgin materials.
